Briefing

Fullstack Developer focused on building scalable cloud applications with React, Python, and AWS. I ship real-world projects to production and strengthen my problem-solving through ICPC participation and competitive programming.

Technical Background	Skills
Languages: Python, JavaScript, SQL, C++ Backend: Django, REST APIs, Object-Oriented Programming Systems: Linux (Ubuntu), process & networking basics Cloud & IaC: AWS (S3, EC2, Lambda), Terraform DevOps: Docker	Team Collaboration Critical Thinking Problem-Solving Debugging & Troubleshooting Self-Learning & Adaptability

Projects

- *Flixxy – Video Streaming Platform* ([GitHub](#) | [Live Demo](#))
Django · PostgreSQL · Redis (Docker) · AWS S3 · HLS
 - Engineered a production-ready streaming platform featuring HLS playback, secure authentication, and automated content moderation.
 - Designed a Redis-based queue system to control concurrent uploads and prevent server overload on limited hardware.

* For in-depth architecture diagrams and technical case studies, please visit my [Portfolio](#).

Experience

- *IT Intern | Chivas (Estadio Akron) — Feb 2026 – Present*
 - Managed and maintained critical IT infrastructure for high-pressure events with 45,000+ attendees.
 - Diagnosed and resolved technical incidents in real-time, ensuring high system availability during stadium operations.
 - Developed an internal full-stack IT maintenance platform using React, Django REST Framework, PostgreSQL, Docker, and Nginx, enabling asset inventory, maintenance workflows, digital signatures, PDF reports, and analytics dashboards.
- *Freelance Full-Stack Developer — Jan 2025 – Present*
 - Designed and deployed end-to-end web applications for real clients, managing everything from architecture to production.
 - Provisioned and managed cloud infrastructure on AWS using Terraform (IaC).

Academics

- Software and Data Mining Engineering at Universidad Autónoma de Guadalajara. Expected graduation date: June 2027. (2023 – present)
- English B2, German A2, native Spanish.
